

Automotive: Electronics Manufacturing Services

Through electronics manufacturing services (EMS) and original design and manufacturing synergy, Flextronics offers customer-centric solutions to the global automotive industry.

Flextronics combines the advantages of a dedicated environment with the benefits of materials sourcing strength, process standardization, and the stability that comes from being an industry-leading EMS provider to offer world-class automotive solutions. From concept to volume production, we work closely with our customers to maintain a focus on product excellence and supply quality.

With more than 15 years of experience in automotive EMS, we create value that increases our customers' competitiveness through our:

- Extensive service offering and product portfolio
- Global footprint to support global launches and local for local manufacturing (LLC)
- Product lifecycle planning aligned with APQP and VDA
- Global validation capabilities and test labs to support product validation and customer approvals
- Strong material purchasing position
- Global account management services

Global Footprint

Americas

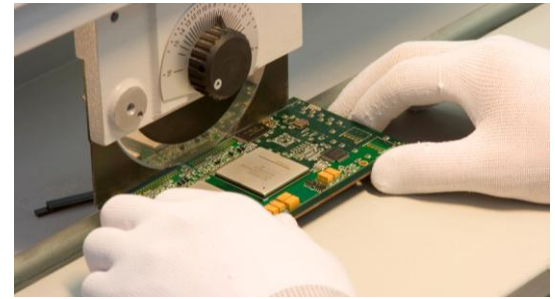

- Toronto, Canada
- Guadalajara, Mexico
- Detroit, Michigan

Europe

- Althofen, Austria
- Frickenhausen, Germany
- Paderborn, Germany
- Sárvár, Hungary
- Zalaegerszeg, Hungary
- Treviso, Italy
- Timisoara, Romania

Asia

- Shanghai, China

Product Examples

Comfort & Safety

- ECUs for Comfort Electronics
- Seat Controls
- Instrument Clusters
- Sun Roof Modules
- Electronic Power Steering Modules
- Electronics for Brake Modules
- Adaptive Cruise Control
- E-Box
- Keyfobs
- Mirror Power Folding Electronics

Navigation & Infotainment

- Navigation and Portable Navigation Devices
- Faceplates
- Audio Amplifiers
- Truck Fleet Management / Tracking Systems
- CD and DVD players
- Car Cradles

Lighting & Others

- Exterior & Interior Lighting
e.g. Back/Front including LED
- Electronic Ignition Switches
- Network Management
- Digital Tachnograf
- LED Driver Modules
- Fan Control Modules
