

Automotive: Lighting

Flextronics provides leading design, manufacturing and logistics services to the light and commercial vehicle markets around the world.

As a designer and manufacturer of comfort and safety components, Flextronics has accompanied and supported car manufacturers and system suppliers for over 80 years.

Our expertise in R&D, design, project management, tooling, validation and logistics positions us to meet the high requirements of the automobile industry. We excel in the integration of multi-functional sensor-based switching systems into defined system components, as well as the development and production of complex kinematics-mechanical components.

As an internationally recognized full service supplier, we provide support for all project stages. Our range of services includes design with all required simulations, prototyping, validation of first off tool parts, over realization of short term change requests by customers, pre-series supply, initial sample inspection due to current automotive directives to JIT/JIS- delivery, as well as providing service parts.

Flextronics combines ergonomics, design, quality, and comfort to meet the highest customer demands. Our in-house simulation software for the calculation of visual effects enables us to throw light in every angle, while our products demonstrate conformance of theory and practice of the production process.

Flextronics is the name of the future for the automobile industry. We are constantly working to achieve increased comfort and safety for automobiles. Innovation isn't just an idea—at Flextronics, we create it.

Product Examples

Interior Lighting

- Overhead Consoles
- Courtesy Lights
- Reading Lights
- Rear Compartments
- Luggage Compartment Lights
- Ambient Lights

Exterior Lighting

- License Plate Lights
- Third Brake Lights
- CHMSL
- Side Indicators
- LED Drive Modules
- Reflectors

Interior Applications

- Cup Holders
- Storage Compartments
- Ashtrays
- Trim Parts
- Face Plates
- Center Stack

Global Footprint

Americas

- Toronto, Canada
- Guadalajara, Mexico
- Detroit, Michigan

Europe

- Althofen, Austria
- Frickenhausen, Germany
- Paderborn, Germany
- Sárvár, Hungary
- Zalaegerszeg, Hungary
- Treviso, Italy
- Timisoara, Romania

Asia

- Shanghai, China
