

## Manufacturing complex mechanical systems and components that provide unprecedented value to our customers

Flextronics is a leading provider of complex system integration and mechanical components for leading manufacturers of capital equipment in the semiconductor, test and measurement, solar, and automation industries. These capabilities are delivered through dedicated teams and specialized sites that focus on requirements specific to the capital equipment market. Our network of capital equipment campuses is located in key theatres of operation and is constantly re-evaluated to align with our customers' evolving manufacturing and supply chain requirements. This unique approach towards developing an extensive network of specialized sites enables us to create:

**Competency** by building critical skills in specialized sites;

**Scale** by deploying those capabilities globally;

**Speed** by enabling multiple simultaneous activities; and

**Consistency** by utilizing common methods of manufacturing.

These capabilities are leveraged by capital equipment customers looking to:

- **Reduce total costs** by transitioning production from an in-sourced to an out-sourced manufacturing model or by moving production from high-cost to low-cost regions.
- **Improve financial performance** by moving from a fixed asset model to a variable asset model.
- **Enhance the customer satisfaction** levels of their end customers by leveraging our specialized lean manufacturing and supply chain management skills to deliver improved quality, reduced lead times, and increased flexibility.

### Our Network

#### Americas

- Guadalajara, Mexico
- Morgan Hill, California
- Plano, Texas

#### Europe

- Althofen, Austria
- Paderborn, Germany

#### Asia

- Shanghai, China
- Singapore

### Our products include:

#### Automation

- Automated Teller Machines
- Self Service Kiosks
- Self Checkout Machines
- Check Sorters
- Motion Controllers

#### Test & Measurement

- Bench-top Testers
- HDD Testers
- Linear IC & Discrete Testers
- Memory Testers
- SOC Testers
- Production Test & Yield

#### Solar

- Photovoltaic Modules
- Thin Film Printers
- Thin Film Sorters

#### Semiconductor

- Robotics
- Wafer Etch
- Wafer Deposition
- Wafer Polishing
- Wafer Cleaners
- Wafer Testers
- Wafer Probers
- Wafer Handlers
- Wire Bonders
