FLEXTRONICS NAMED “STRATEGIC PARTNER OF THE YEAR” AND “BEST-IN-CLASS” SUPPLIER BY LSI

Awards recognize Flextronics’ excellence as a full-system supplier with superior design capabilities and aggressive focus on cost reduction

Singapore, May 17, 2010 -- Flextronics (NASDAQ: FLEX) announced today that it has received two prestigious awards from LSI that include the 2010 “Strategic Partner of the Year” award and the “Best-in-Class” supplier award. These honors were bestowed on Flextronics during LSI’s seventh annual Strategic Partner Executive Conference that was held last week in San Jose, California. Flextronics was evaluated and distinctly recognized for its ability to provide complete end-to-end supply solutions, including highly skilled design services and an aggressive pursuit of cost reductions for LSI.

“We could not be more proud of these honors from LSI because we know the stringent evaluation process LSI establishes to determine award recipients among its many suppliers,” said Michael Clarke, president Flextronics Infrastructure. “To be named the Strategic Partner of the Year and Best-in-Class supplier validates the success of our aggressive pursuit toward continuous improvement for customers like LSI. Thank you LSI for this recognition and congratulations to the hard-working team at Flextronics that has given complete commitment toward ensuring customer satisfaction.”

About Flextronics

Headquartered in Singapore (Singapore Reg. No. 199002645H), Flextronics is a leading Electronics Manufacturing Services (EMS) provider focused on delivering complete design, engineering and manufacturing services to automotive, computing, consumer, industrial, infrastructure, medical and mobile OEMs. Flextronics helps customers design, build, ship, and service electronics products through a network of facilities in 30 countries on four continents. This global presence provides design and engineering solutions that are combined with core electronics manufacturing and logistics services, and vertically integrated with components technologies, to optimize customer operations by lowering costs and reducing time to market.
